Flutter, Dart, Kotlin, Jetpack Compose, nextJS, Clean Architecture, Bloc, Provider, REST APIs, Firebase, Firestore, Google Maps, Push Notifications, In-App Purchases, Background Location, Git, Docker, PostgreSQL, MySQL, JavaScript, C#, Java, Python.

EXPERIENCE

Senior Mobile Engineer | PSTC – Precision Solutions Technologies Company Company (Full-Time)

Apr 2025 - Dec 2025 , **Riyadh, Saudi Arabia** (Remotely)

- Took ownership of a stalled product that had been in development for months with no release, restructured the entire codebase, established a unified design pattern, and shipped the app to production.
- Introduced Clean Architecture across the codebase, eliminating duplicated logic and creating a scalable, maintainable foundation.
- Onboarded and mentored a new mobile team member, defining the team's workflow, coding standards, and architecture conventions.
- Rebuilt 95% of the UI for consistency and responsiveness; reworked 90% of API integrations to improve reliability and reduce failed requests.
- Resolved 100+ accumulated bugs, stabilizing the app and significantly lowering crash rate ahead of the production launch.

Mobile Engineer | Domino ICT (Full-Time)

Apr 2023 - Sep 2023 , **Gaza, Palestine** (on-site)

- Built and refined mobile UI components across multiple apps, ensuring visual consistency with design specs.
- Integrated REST APIs to connect frontend features with backend services; collaborated with the team on debugging throughout the development lifecycle.

Mobile Engineer | Self-Employed

Jun 2021 – Present

Jul 2021 - Present | *Flutter · Android · Bloc · Provider · Firebase · Maps · Payments*

- Designed and launched 6 original mobile apps across e-commerce, delivery, and education — owning architecture, UI, API integration, and store publication end-to-end.
- Delivered 6+ white-label and reskinned apps under NDA, consistently meeting client brand guidelines and deadlines.

PROJECTS

Home of Brands (HOB) – Flutter Mobile App

Jan 2025

- Built an e-commerce app independently real-time product updates and secure checkout, Clean Architecture from the ground up.
- Published on Google Play with optimized performance and responsive UI across device sizes.

Green Card SA – Flutter Mobile App

Oct 2024

- Subscription-based discount app for Saudi users with Arabic/English support, QR code scanning, and in-app purchase tiers.
- Published on both Google Play and App Store with a single Flutter codebase.

Vehicle Tracking App – Flutter Mobile App

Jun 2024

- Live vehicle tracking with animated map markers, route polylines, and real-time location updates.
- Open-sourced on GitHub as a fully functional reference project.

Delivery Box App – Flutter Mobile App

Apr 2023

- Real-time logistics app for drivers and customers — live order tracking, background location, Firebase auth, and push notifications.

- Published on Google Play with stable Firestore sync under concurrent load.

EDUCATION

Bachelor of Engineering – Computer Engineering

Islamic University of Gaza (IUG) - 2024
